

# Next Portal

Share information in the cloud with clients, customers, suppliers, consultants or partners - with Next Portal.

## Streamline collaborations and increase transparency

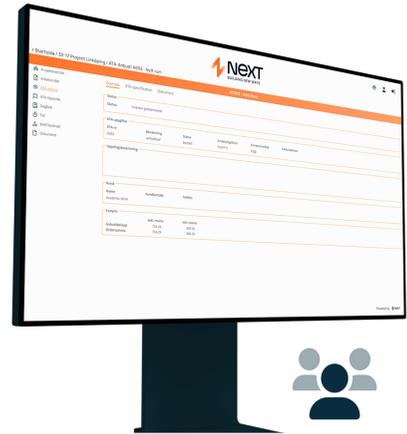

Optimize collaborations and increase transparency with Next Portal. Easily share project-related information such as work orders and details through a secure web portal, where you control the flow of information for increased real-time visibility. Invite external parties such as customers, suppliers and partners to directly access project data from Next, without your involvement. This includes everything from work orders to documents and variation management, with access control to protect sensitive data and ensure necessary information is shared.

## Gain financial control

Streamline the handling of orders and invoicing through the portal, which simplifies the administration of ÅTA work and supplier invoices. This improves financial control and minimizes the risk of error.

- Everything in one place
- Access from your mobile from anywhere
- Seamless integration and compatibility
- Customization and scalability
- Advanced analysis and reporting

Scan the QR code at the bottom right or book a demo and we'll show you!

## Functions

- Invite external stakeholders
- Manage access
- Share information in real time
- Simple and efficient administration of work orders and supplier invoices
- Streamlined order and invoice handling
- Project development, review of documents, self-checks and checklists

We come from the construction industry and we hate project waste.

→ We are tailored for the construction industry as we recognise some of the biggest challenges that our customers face come from a lack of control. Piecemeal automation and limited data integration turns projects into a nightmare of stress, burn-out and failure. Low project margins, limited control of sub-contractor, energy and component costs and limited visibility are all symptoms of poor project control. [next-tech.com](https://next-tech.com).
