

Create a comprehensive building schedule in minutes

Gain an oversight of each project with our agile scheduling software.

Resource Planning

Now you can have 100% control of the resources with the construction industry's smoothest construction scheduling software. Get a quick overview of the project to ensure that tasks are carried out properly, on time and in the correct order. Gauge which teams are facing difficulties so that you can assign additional manpower, equipment, etc.

Keep your clients & colleagues in the loop

Keep your team, client, and contractors aligned – whether they're in the office or on-site – by inviting them to participate in or view the construction project schedule. Planning allows you to illustrate where you are in relation to deadlines and milestones.

Time management

Keep track of your team's progress in relation to project deadlines and milestones. Manage your resources with ease and track worker absence and equipment rental deadlines.

Features

- Free 30 day trial available
- Completely cloud-based, no software required
- Project oversight
- Task, resource & time management
- Mark deadlines & milestones
- Co-ordinate with sub-contractors
- Share with colleagues & clients via link or PDF export
- Print your Gantt chart from A0 to A4

We come from the construction industry and we hate project waste.

→ We are tailored for the construction industry as we recognise some of the biggest challenges that our customers face come from a lack of control. Piecemeal automation and limited data integration turns projects into a nightmare of stress, burn-out and failure. Low project margins, limited control of sub-contractor, energy and component costs and limited visibility are all symptoms of poor project control. next-tech.com.
