

Snagging software for inspections & task management in the field

Save time inspecting, documenting & delegating tasks.

Snagging

Transition from cumbersome paper-based methods to an efficient digital solution. Next leverages technology to simplify inspections, ensuring accuracy and ease of management..

Document management

Do you ever get irritated when searching for photos, invoices, drawings, or minutes? Perhaps you're looking in your email inbox for files attached to an email? And all the while the same question – are the files on your disk, on the server, or perhaps still only in the email inbox? With Next, you can gather all your documents in one place, and they are also accessible from both computers and mobile devices.

Digital checklists

Transform the way inspections and quality checks are conducted with Next's digital checklists. Enable real-time updates, digital signatures, and direct project integration, streamlining quality assurance processes and enhancing compliance management.

Features

- Golden Thread fulfilment
- Task delegation & oversight
- Ideal for HSEQ
- Fully customisable checklists
- Store & retrieve your project documents/photos with ease
- Co-ordinate with sub-contractors
- Generate & send reports for customers

We come from the construction industry and we hate project waste.

→ We are tailored for the construction industry as we recognise some of the biggest challenges that our customers face come from a lack of control. Piecemeal automation and limited data integration turns projects into a nightmare of stress, burn-out and failure. Low project margins, limited control of sub-contractor, energy and component costs and limited visibility are all symptoms of poor project control. next-tech.com.
